JURISDICTIONAL DETERMINATION

Revised 8/13/04

U.S. Army Corps of Engineers

FILE NUMBER:	NAN-2007-372	STRICT (C	LENAN)
DDOIECT LOCAT	ION INFORMATION:		
State:	New York		
County:	Rensselaer		
	of site (latitude/longitude): la	at: 42-45-1	16 Jan: 73 30 05
	area (parcel) reviewed, inch		
	erway: Sweet Mile Creek	ading upidi	103100.5 dejea.
Name of watershed:	-		
JURISDICTIONAL	DETERMINATION		
Completed:	Desktop determination	[]	Date:
•	Site visit(s)	[X]	Date: May 7, 2007
War and a 45° and a company was a 4 a comp			
Jurisdictional Deter	mination (JD):		
United State			e appear to be (or) [] there appear to be no "waters of the ited States" on the project site. A preliminary JD is not appealable
[X] Approved JD - As Check all that apply		ble action (Reference 33 CFR part 331).
	gable waters of the United St wed area. Approximate size		efined by 33 CFR part 329 and associated guidance) ional area:
			33 CFR part 328 and associated guidance) within the ea: 6.23 acres of wetland and 888 linear feet of intermittent stream
* -	75		or wetlands" within the reviewed area. le Information Sheet for Determination of No Jurisdiction.
BASIS OF JURISDI	CTIONAL DETERMINA	TION:	
A. Waters defined ur	nder 33 CFR part 329 as "r	navigable v	waters of the United States":
[] The presence of wa	aters that are subject to the el	ob and flov	v of the tide and/or are presently used, or have been used
in the past, or may l	be susceptible for use to tran	sport inter	state or foreign commerce.
B. Waters defined un	ider 33 CFR part 328.3(a)	as "waters	of the United States":
	- ' '		ere used in the past, or may be susceptible to use in
			ch are subject to the ebb and flow of the tide.
	f interstate waters including		
			ivers, streams (including intermittent streams), mudflats,
			ows, playa lakes, or natural ponds, the use, degradation or
			icluding any such waters (check all that apply):
			elers for recreational or other purposes.
•		-	sold in interstate or foreign commerce.
[] (iii) which are or co	ould be used for industrial pu	irposes by	industries in interstate commerce.
	of waters otherwise defined	-	
[X] (5) The presence	of a tributary to a water iden	tified in (1) - (4) above.
[] (6) The presence of	f territorial seas.		
[X] (7) The presence of	of wetlands adjacent2 to othe	r waters of	the US, except for those wetlands adjacent to other wetlands.

Rationale for the Basis of Jurisdictional Determination (applies to any boxes checked above). If the jurisdictional water or

wetland is not itself a navigable water of the United States, describe connection(s) to the downstream navigable waters. If B(1) or B(3) is used as the Basis of Jurisdiction, document navigability and/or interstate commerce connection (i.e., discuss site conditions, including why the waterbody is navigable and/or how the destruction of the waterbody could affect interstate or foreign commerce). If B(2, 4, 5 or 6) is used as the Basis of Jurisdiction, document the rationale used to make the determination. If B(7) is used as the Basis of Jurisdiction, document the rationale used to make adjacency determination: The wetlands on the site are associated with unnamed tributaries to Sweet Milk Creek, which is a tributary tot en Hudson River, a navigable waterway.

Lateral Extent of Jurisdiction: (Reference: 33 CFR parts 328: [X] Ordinary High Water Mark indicated by: [X] clear, natural line impressed on the bank [X] the presence of litter and debris [X] changes in the character of soil [X] destruction of terrestrial vegetation [X] shelving [] other:	and 329) [High Tide Line indicated by: [] oil or scum line along shore objects [] fine shell or debris deposits (foreshore) [] physical markings/characteristics [] tidal gages [] other:
[] Mean High Water Mark indicated by: [] survey to available datum; [] physical markings; [] vegetar	tion lines/changes in vegetation types.
[X] Wetland boundaries, as shown on the attached wetland deline Environmental, LLC (CE)	ation map and/or in a delineation report prepared by: Copeland
Basis For Not Asserting Jurisdiction: [] The reviewed area consists entirely of uplands. [] Unable to confirm the presence of waters in 33 CFR part 328(a [] Headquarters declined to approve jurisdiction on the basis of 3. [] The Corps has made a case-specific determination that the followable the United States: [] Waste treatment systems, including treatment ponds or lagood [] Artificially irrigated areas, which would revert to upland if the testing and/or diking and ponds created by excavating and/or diking retain water and which are used exclusively for such purpose rice growing. [] Artificial reflecting or swimming pools or other small orname by excavating and/or diking dry land to retain water for prima [] Water-filled depressions created in dry land incidental to conthe purpose of obtaining fill, sand, or gravel unless and until abandoned and the resulting body of water meets the definition 328.3(a). [X] Isolated, intrastate wetland with no nexus to interstate command of the prior converted cropland, as determined by the Natural Reso [] Non-tidal drainage or irrigation ditches excavated on dry land [] Other (explain):	owing waters present on the site are not Waters of ons, pursuant to 33 CFR part 328.3. The irrigation ceased. The gray land to collect and so as stock watering, irrigation, settling basins, or a settling basins, or a settling basins of water created arily aesthetic reasons. The irrigation activity and pits excavated in dry land for the construction or excavation operation is on of waters of the United States found at 33 CFR merce. The water of the united States found at 33 CFR merce. The water of the united States found at 33 CFR merce.
DATA REVIEWED FOR JURISDICTIONAL DETERMINA? [X] Maps, plans, plots or plat submitted by or on behalf of the application [X] Data sheets prepared/submitted by or on behalf of the application of this office concurs with the delineation report, dated Marc [] This office does not concur with the delineation report, dated [] Data sheets prepared by the Corps. ¹Wetlands are identified and delineated using the methods and criteria established in the Corps Wetland Delineation Manual (87 Manual) (i.e., occurrence of hydrophytic vegetation, hydric soils and wetland hydrology).

²The term "adjacent" means bordering, contiguous, or neighboring. Wetlands separated from other waters of the U.S. by man-made dikes or barriers, natural river berms, beach dunes, and the like are also adjacent.
